

**Table 2. Number, incidence rate <sup>1</sup>, median days away from work <sup>2</sup> and relative standard errors <sup>3</sup> of occupational injuries and illnesses involving days away from work <sup>4</sup> to selected parts of body with musculoskeletal disorders <sup>5</sup> in selected ownerships for Montana, 2011**

Ownership	Part of body affected <sup>6</sup>	Total Cases	Incidence Rate	Median Days	Relative Standard Error
private industry	All Selected Parts	1,860	70.6	10	5.7
private industry	2 NECK- INCLUDING THROAT	50	1.8	3	18.3
private industry	20 Neck- except internal location of diseases or disorders	50	1.8	3	18.3
private industry	3 TRUNK	990	37.7	5	6.3
private industry	32 Back- including spine- spinal cord	840	32.0	5	6.5
private industry	320 Back- including spine- spinal cord- unspecified	310	12.0	3	8.4
private industry	321 Thoracic region	20	0.7	2	27.6
private industry	322 Lumbar region	420	15.9	10	7.7
private industry	323 Sacral region	80	3.0	3	14.5
private industry	33 Abdomen	120	4.6	10	12.0
private industry	330 Abdomen- except internal location of diseases or disorders	120	4.6	10	12.1
private industry	34 Pelvic region	20	0.8	5	26.1
private industry	4 UPPER EXTREMITIES	510	19.4	22	7.3
private industry	41 Shoulder(s)- including clavicle(s)- scapula(e)	250	9.4	28	9.1
private industry	42 Arm(s)	70	2.6	14	15.5
private industry	420 Arm(s)- unspecified	30	1.1	13	22.7
private industry	43 Wrist(s)	140	5.3	22	11.4
private industry	44 Hand(s)	30	1.0	8	24.6
private industry	48 Multiple upper extremities locations	30	1.0	3	23.8
private industry	5 LOWER EXTREMITIES	260	10.0	10	9.0
private industry	51 Leg(s)	190	7.1	12	10.1
private industry	512 Knee(s)	150	5.6	17	11.1
private industry	513 Lower leg(s)	40	1.4	10	20.5
private industry	52 Ankle(s)	40	1.4	5	20.5
private industry	8 MULTIPLE BODY PARTS	50	1.8	18	18.4
private industry	89 Other multiple body parts	20	0.8	19	27.5
private industry	899 Multiple body parts- n.e.c.	20	0.8	19	27.5
local government	All Selected Parts	170	56.9	7	15.0
local government	3 TRUNK	90	29.4	7	19.7
local government	32 Back- including spine- spinal cord	70	24.6	7	21.3
local government	320 Back- including spine- spinal cord- unspecified	40	12.5	7	29.1
local government	322 Lumbar region	30	9.4	6	33.3
local government	4 UPPER EXTREMITIES	50	18.4	12	24.3
local government	41 Shoulder(s)- including clavicle(s)- scapula(e)	30	9.0	20	33.9
local government	5 LOWER EXTREMITIES	20	6.9	7	38.4
local government	51 Leg(s)	20	6.9	7	38.4
local government	512 Knee(s)	20	5.1	7	44.6
state government	All Selected Parts	90	47.1	12	7.8
state government	3 TRUNK	50	24.6	10	12.1
state government	32 Back- including spine- spinal cord	40	18.2	5	14.5
state government	320 Back- including spine- spinal cord- unspecified	30	13.7	10	17.1
state government	4 UPPER EXTREMITIES	30	14.1	25	16.8

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as:  
 $(N / EH) \times 20,000,000$  where:

N = number of injuries and illnesses,  
EH = total hours worked by all employees during the calendar year,  
20,000,000 = base for 10,000 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Median days away from work is the measure used to summarize the varying lengths of absences from work among the cases with days away from work. Half the cases involved more days and half involved less days than a specified median. Median days away from work are represented in actual values.

<sup>3</sup> Relative standard errors are a measure of the sampling error of an estimate. Sampling errors occur because observations are made on a sample, not on the entire population. Estimates based on the different possible samples of the same size and sample design could differ. Relative standard errors less than 0.05 are not shown.

<sup>4</sup> Days away from work cases (DAFW) include those which result in days away from work with or without restricted work activity.

<sup>5</sup> Includes cases where the nature of injury is: pinched nerve; herniated disc; meniscus tear; sprains, strains, tears; hernia (traumatic and nontraumatic); pain, swelling, and numbness; carpal or tarsal tunnel syndrome; Raynaud's syndrome or phenomenon; musculoskeletal system and connective tissue diseases and disorders, when the event or exposure leading to the injury or illness is: overexertion and bodily reaction, unspecified; overexertion involving outside sources; repetitive motion involving microtasks; other and multiple exertions or bodily reactions; and rubbed, abraded, or jarred by vibration. Although these cases may be considered MSD's, the survey classifies these cases in categories that also include non-MSD cases.

<sup>6</sup> Occupational Injury and Illness Classification System (OIICS) version 2.01.

NOTE: Dashes indicate data that do not meet publication guidelines or data for incidence rates less than .05 per 10,000 full-time workers. The scientifically selected probability sample used was one of many possible samples, each of which could have produced different estimates. A measure of sampling variability for each estimate is available upon request.
